Paolo Mangia

Full Stack Developer, Front-end Developer

👤 Profile

Passionate about coding with 5 years experience in Web Design and Mobile Development. I'm always looking for the coolest and most recent programming technology to learn and use for my upcoming projects. I'm highly intrested in blockchain and cryptocurrencies but at the same time i'm discovering and getting intrigued by the world of machine learning and chat bots.

Currently i'm collaborating with an italian startup while i pursue new opportunities and can be reached either through linkedin (link on the right), by phone at +34 685399482 or on skype at @scratur3

 IT Goals for the future:
- find an appealing remote position.
- get involved in side projects on free time
- mess around with Alexa, chat bots and learn Solidity

Technologies i use:

 Front end**:**

- HTML5, CSS3, SASS, Javascript, ES6/7, Web components.
- Frameworks: AngularJS, ReactJS, EmberJS, React Native.
- Libraries: Lodash, JWT, jQuery.
- Build Tools: NPM, YARN, Webpack, Browserify, Gulp.
- Templating: EJS, Handlebars.
- Hybrid app frameworks: Ionic, Cordova, OnsenUi

 Back end:

- Node.js, BackboneJS
- Frameworks: ExpressJS.

 Databases & query builders:

- MongoDB, GraphQL, MySQL, PostegreSQL, CouchDB, Knex. (bookshelf.js, sequelize, mongoose)

 Infrastructure:

- Docker, Amazon Web Services (AWS), Lambda (Serverless framework)

 CI/CD:

- Gitlab CI/CD, Jenkins, Travis CI, CircleCI

 Testing:

- Jasmine, Karma, Mocha.

💼 Employment History

Details

Calle Berlina 1, Costa De Antigua, 35610, Spain, +34 685399482
